DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 would be allowable if rewritten or amended to overcome the respective rejection(s) under 35 U.S.C. 101 and 35 U.S.C. 112, 1st and 2nd paragraph, set forth in this Office action.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-21 are rejected under 35 U.S.C. 101.

Regarding claims 1-10 are rejected under 35 U.S.C. 101 because the language of the claims raise a question as to whether the claims are directed merely to a descriptive computer program/function/code. The term "computer-supported project planning tool" is being interpreted as a program. The description or expressions of a computer program/functions/codes are not physical "things". The descriptive material is not recorded on some computer-readable medium that, when executed, causes a computer to perform said computer program/functions/codes.

Regarding claims 11-21 are rejected under 35 U.S.C. 101 because the language of the claims are directed to non-statutory subject matter. The description or expressions of a computer program/functions/codes are not physical "things". The descriptive material is not recorded on some computer-readable medium that, when executed, causes a computer to perform said computer program/functions/codes.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-21 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claim 1-21, the specification does not describe, in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, how to receive a selection by a user of the project planning tool, of at least one catalog including a number of standard descriptions of elements whose standard descriptions cannot be changed by the user and to which a first description priority number is assigned. Furthermore, the specification does not describe, in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, how to receive a specified at least one further description of the project planning tool. Furthermore, the specification does not describe, in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, how to assign an installation priority number.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 22-31 are rejected under 35 U.S.C. 112, second paragraph.

Regarding claims 22-32 rejected as being incomplete for omitting essential elements, such omission amounting to gap between the elements. The omitted elements are elements for "permitting".
